**Subject:** RE: Request to UW/NOAA: Any comments?

Hi Jill,

Just FYI – Cheryl is out of the office this week, and in email exchange with her and Walt it looks like she can get to the aragonite saturation reinterpretation (so that the metrics match) for the NOAA data and plotting when she returns next week. It sounds like that should work for your timeframe.

Thanks, Rochelle

Hi all,

I just spoke with Mike, and expressed some concerns about how long it might take to receive a reply and move forward. I would like to just call Simone Alin directly and verify with her that we received all of the data they had, and ask the other follow-up questions Mike had in his draft. Then we know immediately what we're working with. I will still try to schedule a meeting at the end of August, but hope that by that time we will have had time to assess the data they sent and discuss our interpretation of it with them. I'll give her a call tomorrow, so please let me know by COB today if you don't like this approach. Thanks so much.

jill

As a follow-up to our meeting I have developed a draft letter to send to UW/NOAA. Please edit and pass back. After more thought I think it is better the letter come from the program (hence Jill or Rochelle). Also, I can check on Monday but if someone has a few minutes to try and find a date and time to meet with UW/NOAA prior to the end of August that would be great. While great to have everyone at that meeting with UW/NOAA I think we should have the core folks as the priority. Thanks.
